 30 October 1961

Dr. W. F. Libby  
Department of Chemistry  
University of California  
Los Angeles 24, California

Dear Bill:

Thank you so very much for your kind and thoughtful letter of October 10th regarding my appointment as Director of Central Intelligence and also for your offer to be of assistance.

I was pleased to learn that the program you are planning for the University of California to get into the space business is going forward favorably. I shall look forward to a progress report on this project and hope that we have an opportunity for a visit in the near future so that we can discuss this and other matters of mutual interest.

Warm personal regards,

/S/ John (signed by TML)
